KNOX Delayed pinking in fresh cut let-

KNOX The trait

KNOX is the result of 10 years of research and development work by Rijk Zwaan. Its unique effect was subsequently confirmed in various in-house laboratory tests and large-scale production trials.

KNOX Inside

Following successful testing in collaboration with growers and fresh cut companies, around 10 varieties already have KNOX inside. The range of KNOX-based varieties will continue to be expanded in the coming years.

KNOX Extended shelf

Due to the delayed pinking, KNOX can extend shelf life by approximately two days. Contributing to better inventory management for retailers and reducing their waste.

KNOX Happy

Pre-packaged salads will stay fresher for longer, resulting in happy consumers. It is expected that KNOX will lead to a higher purchasing frequency and therefore to increased consumption of bagged salads.

41-149 RZ (t)

Cos lettuce

HR Bl:17-26,28,32/Nr:0 | **IR** Ss (Rs)

- Dark green traditional Cos type
- Has solid ribs

45-161 RZ (t)

Iceberg lettuce

HR Bl:16-26,28,32/Nr:0 | **IR** LMV:1

- Iceberg for temperate Spring to Autumn production

41-514 RZ (t)

Cos lettuce

HR Bl:17-26,28,32/Nr:0

- Green open heart Cos type
- Has solid ribs

79-10 RZ (t)

Salanova® Crispy (t)

HR Bl:16-32/Nr:0 | **IR** LMV:1

- Green Salanova® Crispy
- Comparable with Exponent RZ

42-156 RZ (t)

Butterhead lettuce

HR Bl:16-32/Nr:0

- Indoor Butter type
- Temperate summer or mediterranean Spring and Autumn

79-141 RZ (t)

Salanova® Butter (t)

HR Bl:16-32/Nr:0

- Green Salanova® Butter
- Comparable with Descartes RZ

42-171 RZ (t)

Butterhead lettuce

HR Bl:16-32

- Indoor Butter type
- Mediterranean tunnel production from Spring to Autumn

81-04 RZ (t)

Batavia lettuce

HR Bl:16-32/Nr:0 | **IR** LMV:1

- Dark green Batavia

(t) = Only trial seed available
